PERCORSO

FORMAZIONE

SETTEMBRE 2019 - AGOSTO 2021

CAS Spatial Planning
ETHZ
Zürich, Schweiz

INSEGNAMENTO

GENNAIO 2021 - GIUGNO 2021

Visiting Studio "Habitational Seeds in Hong Kong's Odd Lots"
Hong Kong
Assistant Adjunct Professor

The studio "Habitational Seeds in Hong Kong's Odd Lots" uses drawings as an analytical, forensic tool, that allows to measure and understand spatial, ecological, social and economic conditions, as well as a tool for subjective, spatial immersion. By creating a catalogue of "odd lots" and of the emerging processes to identify and document them,

students consider the environment, built habitat and bodies as mutual resources and thereby understand the impact and responsibilities of the proposed project on its social and natural environment, and implement and develop a site-specific typology of collective housing or related program.

Taught together with Dieter Dietz; Assistant: Kent Mundle.

FORMAZIONE

SETTEMBRE 2009 - DICEMBRE 2011

MSc ETH Architecture
ETHZ
Zürich, Schweiz

FORMAZIONE

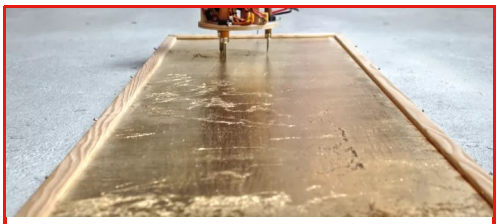

SETTEMBRE 2005 - GIUGNO 2008

BSc EPF Architecture

- Programma(i) : Industria e artigianato

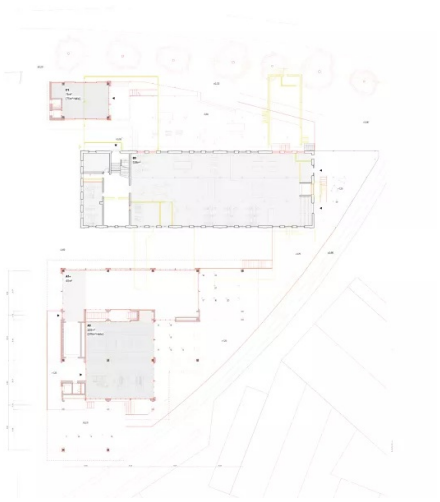

Since 2020, the well-known experimental Stahl-&Traumfabrik AG, with its carpentry, locksmith workshop, and craft know-how pool, has its production site in the protected former drying plant in Schlieren. In collaboration with Pfeffermint AG and Architecture Land Initiative, a project was initiated to open this space to other companies, practices, creative workers, craftswo.men, and production facilities. The aim is to develop a place in synergy with its productive environment that simultaneously resonates with the rapid transformation of its surroundings.

Wer schreit gewinnt: Eine Kinetische Installation aus Sperrholz und Goldfolie.

Das Phänomen der ECHO CHAMBER beschäftigt unsere Generation zunehmend. Unser Projekt sucht einen spielerischen Umgang mit dem Thema. Die akustische Aktivität im Ausstellungsraum wird hierbei in kinetische Energie übersetzt; es entsteht ein hysterisches Abbild der Realität in der glänzenden Oberfläche.
Die Installation entstand im Rahmen der "Window of Fame" Veranstaltung zum Thema "Bubbles".
